

# Pathway's **Free** SecureNet Service

## Guards Your Network Every Minute Of The Day

Each month, Pathway Communications stops hundreds of thousands of viruses and millions of spam emails from reaching clients such as you. Unfortunately, virus designers are becoming more sophisticated and have begun sending worms and viruses via web sites, web mail and FTP. Hackers are also devising new methods to penetrate networks and bring down servers and networks.

**Pathway SecureNet now delivers a much higher level of security - free:**

### Advanced Antivirus, Worm, Spyware Detection and Blocking

- ▶ Detects and eliminates viruses, worms and Trojans, from web traffic, POP/SMTP based email, web email and FTP sites.
- ▶ Stops spyware, keystroke loggers and malicious Java Applets and ActiveX scripts from entering your network via the Internet.

### Real-time Intrusion Detection and Prevention

- ▶ Provides real-time detection and prevention of over 1300 types of network attacks and probes!
- ▶ Identifies attacks as they commence and takes immediate and automatic action to prevent them.

**It would cost you thousands of dollars to implement and manage this service yourself. Pathway offers you this service at NO additional charge.**

### YOUR SECURITY IS PARAMOUNT!

#### What we currently offer:

- Inbound and Outbound Email Virus Scanning
- Advanced Spam Control
- Industry Leading Firewall
- 24 x 7 Monitoring of Your Connection
- Security Assessments

#### Our new, complete solution NOW also includes:

- Advanced Antivirus, Worm, Spyware Detection and Blocking
- Real-time Intrusion Detection and Prevention

### What do viruses and network intrusions cost?

The average loss caused to North American companies by denial of service attacks in 2004 was estimated at \$96,892.

**Computer Security Institute**

Companies spend on average almost \$100,000 to recover from virus or worm attacks.

**ISCA Labs**

**Quality** Internet Solutions
