

Maximize performance with your own Fibre Optic line

Fibre Optic Internet Access Solutions

If your business depends on a complex internal or multi-office IT infrastructure, you need reliable, high-capacity connectivity. Pathway's 10-1000BASE-F (Full Duplex 10- 1000Mbps Speed) Internet Service uses Canada's largest fibre optic network to support critical applications and high volume Internet usage.

This rigorously engineered, robust, high-capacity service has several levels of built-in redundancy and provides seamless internetworking as well as the ability to connect distributed locations in a secure, highly reliable form.

Ideal for businesses which use:

- Real time applications across different branch locations
- Access to remote, central databases
- Multimedia networking and video seminars
- Distance learning
- Hospital remote diagnostics and image transfer
- Video surveillance
- Inter-location IP telephony (VoIP)
- Electronic banking

About Pathway

Established in 1995, Pathway Communications was the first Canadian company to offer a unified portfolio of Internet, Network Integration and software development services from a single source. Our Managed Internet, Data Centre and Colocation Services are available in Ontario, Quebec, British Columbia, Alberta, Manitoba and Nova Scotia. Pathway is committed to innovation, quality and customer satisfaction and strives to deliver sustained value to client. Pathway Communications has the distinction of being showcased as a success story by Sun Microsystems and was the first Internet Service Provider in the world to acquire ISO 9002 certification. Pathway is now certified under the new ISO 9001-2008 standard and all key technical staff and managers are ITIL certified. Pathway is part of the Pathway Group of Companies (www.pathcom.com), which offers Internet, IP Telephony, IT Management and BPO services to clients across Canada and employs over 140 staff in Toronto, Montreal and India.
