

Software Developer Team Lead Orion Technology, a Division of Rolta Canada Limited

“Horia is a dedicated developer with a passion for excellence. He is quick to learn new technologies as well as to formulate solid solutions to business problems. I have no hesitation in recommending Horia for any role or task for which he feels himself qualified.”

December 16, 2011

Chris Atkinson – *Senior Vice President, Orion Technology, a Division of Rolta Canada Limited*
managed Horia at Orion Technology, a Division of Rolta Canada Limited

“Horia is a good developer who strives to excel in all tasks he works on. He takes the initiative to identify things that can improve the product that he is working on. He looks critically at the requirements, process, design and code.

“Horia is a dedicated designer and developer. He is diligent and hard working. He is research oriented and can go in-depth to analyse technical problems and resolve them.

Horia is good at quickly coming up to speed with new technology. He was assigned tasks as a SharePoint developer and Silverlight developer without having any prior experience in these areas and he picked up skills in these areas and did his job. He also did not have prior experience in GIS domain and yet worked with ease on building GIS tools and technology.

Horia has developed experience and expertise with several Microsoft technologies. He has good research and design skills. He built various prototypes and worked on projects apart from being a product developer at Rolta Canada Ltd. He worked on UI models, database intensive applications, Web Services development, SDKs, SharePoint web part development and Core Silverlight library development.

Horia is good as an individual contributor and can work as part of a team. He has exposure to delivering products and solutions using various SDLC approaches including Agile/Scrum.

I wish Horia well in his career.”

December 4, 2011

Satinath Sarkar – *CTO, Orion Technology Inc*
managed Horia indirectly at Orion Technology, a Division of Rolta Canada Limited

“I have known Horia for about 4 years, and during that time I had the opportunity to indirectly manage him on many enterprise GIS initiatives. I knew Horia's works from a number of POC's that spanned from air dispersion modeling, to SharePoint integration and collaboration. Horia impressed me with his dedication, creativity, demeanour and attention to detail, and I believe he would add strength to any organization based on his skill sets.”

December 8, 2011

Shafik Jiwani – *Executive Vice President, Global GIS Business Development, Rolta International Inc.*
managed Horia indirectly at Orion Technology, a Division of Rolta Canada Limited

Senior Software Developer Dundas

“I have worked with Horia on a consulting project for very important client. Horia and I were forced to learn and work with SDK that was 1) still in development and 2) not documented, but we were not given much time to spend on planning and learning.

In this project Horia has demonstrated:

- very strong architect skills
- very strong planning skills
- very strong programming skills
- very strong investigative/deductive skills
- attention to detail and willingness to learn new technologies, practices, etc.

Together we have done some very interesting stuff, and also tasks that were not as interesting or challenging (i.e. FxCop compliance).

In my opinion Horia can be assigned to and complete any programming, architectural, design, etc. task.”

Peter Zajac – SDE, Microsoft Co

managed Horia indirectly at Dundas

Senior Software Developer / System Architect Travtech (Omega World Travel)

“Horia is a great software engineer with a strong math background. I enjoyed working with him. His attention to detail is exemplary.”

December 29, 2011

Bogdan Cirlig – *Sr. Application Developer, Omega World Travel / TravTech*
managed Horia indirectly at Travtech

“Horia is a top professional with many areas of expertise, in particular .Net, attentive to detail and deadlines and with a great learning capacity. He is analytical and creative, capable to add value and efficiency to every project he touches. Horia is great to work with.”

March 24, 2008

Stefan Niculescu Maier – *Owner, NIMS*
managed Horia indirectly at Travtech

“Horia has worked for me for over 2 years at Travtech. I was his direct supervisor. He was the lead System architect for the corporate booking engine. He was also responsible for working with the Travtech Team in Bangalore, India and they had an excellent mutual professional respect. His commitment to the project was impeccable and the hours he put in did not matter. He is highly skilled in his skill set and his role was to develop an object model to house the business objects of a corporate booking which interfaced with the third party connectors. He can shed more light on this project.

If I get an opportunity again to hire, he will be the first person I will hire. I wish him all the best in his future endeavors...”

Top qualities: Expert, On Time, Creative

May 8, 2007

Devakumar Kadalur – *Project Manager, Omega World Travel*
hired Horia as a IT Consultant in 2004

“Horia is a very skilled IT professional, with excellent managerial capabilities. I highly recommend him for advanced software engineering/development positions or IT management.”

December 9, 2011

Ciprian Sufitchi – *Software Development Manager, Omega World Travel*
worked directly with Horia at Travtech

“You want somebody to answer any technical question you may have? Horia is the person to ask.”
